

## **OCCUPATIONAL HEALTH AND SAFETY POLICY**

Our occupational health and safety system is operated on the basis of well-established company standards that comply with the legal requirements. We are all committed to protecting the health and safety of everyone involved in our production processes.

- Our most important asset is our people. Therefore, we strive to minimize occupational health and safety risks and keep under control at all times.
- Main one of the management's key objectives is to create and enforce a culture of prevention.
- We identify, evaluate and keep dangerous work processes under control.
- Having a safety mindset is a fundamental responsibility of every employee. Our goal is that all members of our staff at every level of the company know and observe our safety regulations.
- We ensure proper working conditions and working environment for our employees, partners and visitors.
- We rely on occupational safety specialists to regularly check our work and protective equipment.
- In order to grow and develop our business, we periodically conduct internal and external audits to review our systems and processes.
- We organize regular occupational safety and health training courses to broaden and refresh the knowledge of all team members and to ensure the practical application of such knowledge.
- We set annual health and safety targets to enhance the importance of these areas in our daily life and to achieve a steady and company-wide progress.
- We ensure that each accident and near miss accident is fully investigated and properly documented.
