

Dear Partners,

We are in view...

A rare and lucky combination, when years of experience meets the spirit and plasticity of a start-up company.

The furnishing of our temporary office is ongoing. We can occupy it and start working there from 1st February. The office is placed right next to the factory site so we can follow each phase of the construction work. The factory is expected to be ready in September 2018. Naturally we can then move into the modern building, which will meet all our requirements. Up to that time we have a lot of work to do.

The main directions of our work in the upcoming months are developing the quality assurance and management systems, testing machines, visiting customers, selecting and calling on suppliers. To fulfill all these tasks we need an enthusiastic, reliable and experienced team. A four-person management and 7 staff who are active in the areas of purchasing, quality assurance, technical support, maintenance and controlling make up the correct team.

The opportunity is now given for us to create effective and well-considered systems and processes from the very first moment, which will lead to the satisfaction and trust of our partners in the end. To conclude, we keep an eye on everything and we trust that Nordfilm Packaging will always be at the frontline of the packaging industry in Hungary and beyond.

Looking forward to a successful cooperation

Agnes Neuhaus
Sales Manager
