

**Dear Partners,**

**We perfectly met the requirements...**

We have moved forward methodically in order to achieve our objectives during the two and a half years since the foundation of Nordfilm Packaging Kft. The factory stands, the machines are running, the team is excellent and the orders are coming. However, we needed to be certified in order to show to our customers that our well-designed processes and systems operate in full compliance with the applicable requirements and regulations.

As packaging materials, that come into contact with food constitute a large part of our portfolio, we had to demonstrate that we complied with the hygienic-, food safety-, and quality requirements of the HACCP standard, and therefore we have created a documentation system that enables us to keep track of and retrace each step in our production processes. We have eliminated potential food safety hazards by implementing controlled processes and strict hygiene rules, and demonstrated our commitment to consumer safety and to maintaining good relationships with all stakeholders in the food processing industry.

We have also confirmed our commitment to the environment and to our goal of running our production processes by minimizing harmful and negative effects on the environment and by complying with all the applicable legal requirements and regulations.

As a result we are proud to announce that we own the following certificates:

- BRC Global Standard Packaging and Packaging Materials (Grade AA)
- ISO 9001:2015
- ISO 14001:2015

We hope to welcome you among our partners soon!

**Looking forward to a successful cooperation,**

**Agnes Neuhaus**  
Sales Manager
